

LINA

Harmonious

A REFINED COFFEE EXPERIENCE

*Reliable
quality*

Lina is our elegant and intuitive coffee machine that brings warmth, sophistication, and high performance to any space.

Lina offers your customers reliable, high-quality, customizable drinks. From rich coffee beverages to soluble drinks, hot water, and optional cold still or sparkling water, Lina delivers a wide variety of flavorful options tailored to every taste.

At the heart of Lina is a stunning 10.1" high-resolution touchscreen with a next-generation interface. Inspired by the best in consumer technology, it features lifelike icons and smooth navigation, making drink selection effortless and engaging.

But Lina isn't just about aesthetics. Its refined silhouette, soft vertical line pattern, and warm color accents in pearl beige or silver are designed to elevate any environment—while every detail, like the intuitive service menu and reused components, reflects thoughtful craftsmanship and care.

With hassle-free maintenance and easy cleaning, Lina ensures smooth operation in offices, cafés, and public spaces alike. And with our ConnectMe® solution, you can share brand videos, images, company updates, or advertisements directly on the screen—boosting user engagement and brand visibility.

FEATURES

1. 10.1" Touchscreen Interface

High-resolution display with lifelike icons and smooth navigation.

2. Elegant Design

Soft silhouette with vertical lines symbolizing the bean-to-cup journey.

3. Stylish Color Accents

Anthracite base with a pearl beige or optional silver finish.

4. Sustainable Design

Components made from recycled materials, like the door frame, back plate, drip tray, and cup stand

5. Intuitive Service Menu

Simplifies setup and daily maintenance.

RELIABLE, SMOOTH, AND EASY MAINTENANCE

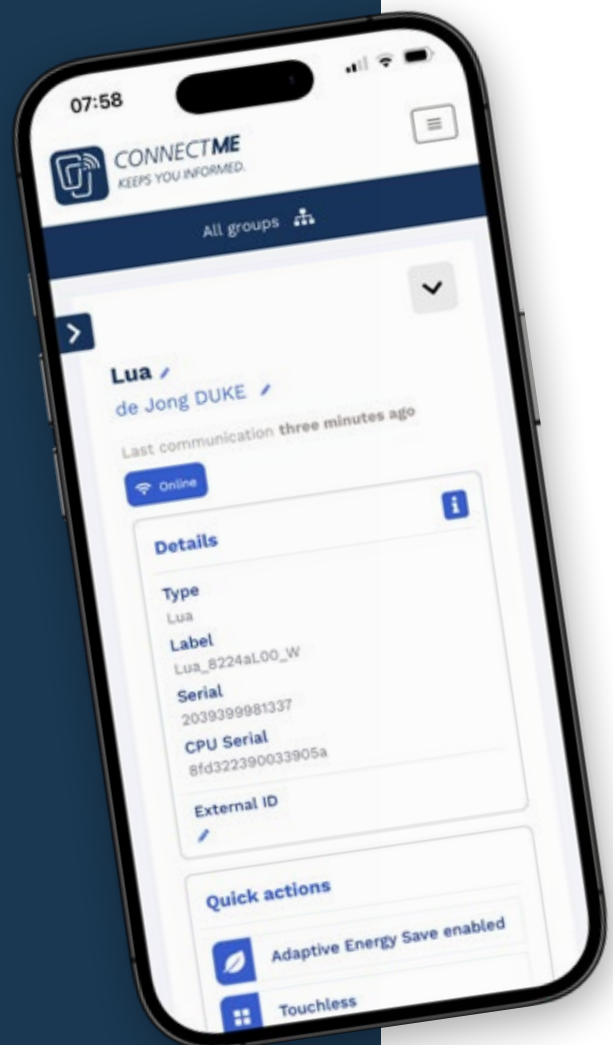

Our coffee machines are designed to stand the test of time. They ensure smooth operation with reliable performance, easy maintenance, and low total cost of ownership (TCO). We believe in intuitive design that makes our products easy to use for customers, consumers, and technicians. Our ConnectMe solution empowers you to diagnose and solve problems remotely, enabling higher service at lower costs.

CONNECT YOUR COFFEE MACHINE

ConnectMe is our two-way communication connectivity tool that helps you improve customer service and ensure hassle-free maintenance. When a coffee machine is connected to the internet, you can access all machine information by simply logging in. You can diagnose and solve problems without leaving your office. This allows you to help your customer while saving time and resources, so you can deliver higher service and lower costs.

With ConnectMe, you'll get to know your coffee machine(s) like never before. ConnectMe provides you with all the data to do preventive maintenance, like part replacement. Consumption data is also available, so you can plan cleaning during off-peak hours or put machines in energy-saving mode when they aren't being used.

Transform your coffee machines into interactive communication platforms and use ConnectMe for announcements, brand videos, and advertisements. Lua also allows you to create and manage polls. Use them to follow user preferences, track satisfaction and more.

YOUR CHOICE OF LINA TECHNOLOGY

Bean-to-cup

CoEx XL®

Our CoEx XL technology has a “barista twist” that provides an even coffee bed for optimal extraction. Our patented pressure regulator guarantees consistent coffee quality every time. Recipes are easy to set up. Gram throw between 8 and 20 grams.

SUSTAINABILITY

We take pride in taking good care of our company, each other, and our world. Today and all the days ahead.

Our machines are designed in line with our ACT2 circular guidelines using high-quality and partly recycled sustainable materials. This ensures machines are easy to repair, refurbish, and recycle, reducing their environmental impact throughout their lifecycle.

When our machines are connected to ConnectMe, additional energy-saving benefits become evident. Customers can save up to 30% of energy through an adaptive energy-saving mode, on top of the regular pre-programmed energy-saving setting. ConnectMe analyzes user trends on the machines and automatically activates the energy-saving mode when appropriate, ensuring that the equipment remains operational whenever it is needed.

Circular design

TAILOR TO YOUR NEEDS

We offer a wide variety of options and accessories to tailor your machine. Configure the machine to your customers' specific needs. Your choices include: one or two whole beans, milk powder, chocolate powder and vanilla powder. Available options include a base cabinet and a payment system.
